Welcome to my Webpage

Student Footballer Future President and World Savior

Welcome to my website! I'm Daniel Ianev — a motivated and curious individual passionate about football, technology, and continuous self-improvement. "Chance favours those in motion," is one of my favourite quotes, hopefully telling you a bit about me. Here you can explore my CV, learn more about who I am, and get in touch with me. Thanks for visiting!

CV My education, skills and experience
Gallery A collection of photos representing my hobbies and experiences
About me A more informal page about my personality and interests
Contact A way to reach me

The Index/Welcome page displays 2 short texts giving the user some insight on what to expect. There are also 2 images of me, a navigation on the top, `<nav>`, with links `<a>`, to help the user orientate themselves around the webpages.

In my `<main>`, there is a `<div>` with a `<p>` for short text, and a `<table>` for my table of contents. The footer is outside the main, and is in a fixed position

The general font and overall style of the site I kept simple and minimalistic.

For the images I used a position absolute, divs and used percentages and pixels to move them to that position.

The images disappear when the screen is made smaller, I used media queries

**Daniel Ianev**

Aspiring Computer Scientist

Profile

I am Daniel Ianev, born in 2004 in Sofia, Bulgaria. A driven and goal-oriented individual, I have consistently developed my leadership and interpersonal skills, particularly through my experience as a prefect at the Deutsche Internationale Schule Johannesburg. In this role, I strengthened my ability to manage teams, communicate effectively, and handle responsibility with discipline and respect. My background as both a leader and an athlete has instilled in me a strong work ethic, adaptability, and a commitment to teamwork. These qualities have prepared me to excel in dynamic and fast-paced environments where quick thinking and collaboration are essential. I am focused on personal growth, continuous improvement, and making a meaningful contribution to any organization or team I am part of.

Experience**Liverpool Player**

As a professional footballer for Liverpool FC, I've competed at the highest level of the Premier League and European competitions, consistently contributing to both domestic and international successes. I excel in tactical awareness, precise passing, and dynamic attacking or defensive play, adapting seamlessly to various formations and strategies under high-pressure match situations. Collaborating closely with teammates and coaching staff, I've helped drive the team to key victories, while maintaining peak physical performance and discipline both on and off the pitch. Beyond the field, I engage with fans and the community through outreach programs and public appearances, representing Liverpool with professionalism and passion.

Clash Royale

As a professional Clash Royale player, I've competed at the highest levels in international tournaments, consistently ranking among the top players in global leaderboards. My expertise spans deck building, card rotation strategies, and real-time adaptive gameplay, allowing me to outthink opponents under intense pressure. I've collaborated with teams and coaches to analyze meta trends, refine tactics, and optimize performance for both individual and team competitions. Beyond competing, I've streamed gameplay to thousands of fans, providing tutorials, live commentary, and strategy guides, establishing a strong presence in the esports community.

Neighborhood Protector & Web-Slinger Extraordinaire

For years, I've patrolled the streets, rooftops, and subways of New York City, stopping petty crimes, muggings, and the occasional supervillain shenanigan. My web-swinging skills and acrobatics let me reach trouble spots in seconds, and my custom web-based gadgets—web grenades, nets, and sticky traps—have a 100% mission success rate. I've worked closely with local law enforcement to keep civilians safe while neutralizing threats, and I excel at thinking on my feet when every second counts.

Chess Experience

As a Chess Grandmaster, I have competed in elite international tournaments, consistently ranking among the top players in the world. My expertise lies in advanced strategic planning, tactical calculation, and deep opening preparation, allowing me to anticipate opponents' moves and adapt under intense time pressure. I have collaborated with coaches and analysts to refine my play, study evolving meta-strategies, and maintain peak competitive performance. Beyond competition, I contribute to the chess community through teaching, streaming, and writing analysis, sharing insights that inspire and educate aspiring players worldwide.

Computer Science

As a computer scientist, I have contributed to some of the world's largest and most influential technology companies, designing and implementing scalable software solutions that impact millions of users daily. My work spans machine learning, distributed systems, and algorithm optimization, with a focus on building efficient, reliable, and secure systems. I have led cross-functional teams, collaborated with engineers and product managers, and solved complex technical challenges under tight deadlines. Beyond development, I mentor junior engineers, contribute to open-source projects, and stay at the forefront of emerging technologies to drive innovation and excellence across every project I undertake.

In the CV page, I used `<section>` and `<div>` elements for all my content.

I used display flex with justify-content, align-items and other similar functions to position everything in the way I wanted to.

I kept this page simple and got motivation from my original CV that I use for applications. Arial for font.

I used a link `<a>` on my email under contact.

Footer is position relative set to left and bottom (and the remaining pages too)

My Football Starting 11

© 2025 Daniel Ianev | All Rights Reserved

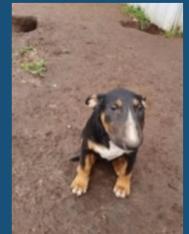

I put all my images in a `<main>` with `<div>` for each position, which is goalkeeper, defender, midfielder and attack

I used display flex to position the players how they would be positioned in a real life formation.

The background image is part of my `<main>`, where I have it fixed and set to cover.

When the screen is resized for smaller devices, all the images align in a column where the user can scroll in order to view them all. I used media queries

Super Epic Pictures

© 2025 Daniel Ianev | All Rights Reserved

4 images per <div>, with display flex to put them in those positions. The divs are part of <main>

When the user hovers over a picture, it slightly increases in size

When the screen size is made smaller the images align in a column, where the user can scroll. I used media queries

About me

I like to play video games, go out with friends, have drinks and watch series or movies. As a console gamer, PlayStation, majority of my time spent gaming was on FIFA, Call of Duty and Fortnite. When it comes to socialising, going out and having fun with my friends, having some drinks and doing what we like to do is peak bromance. Epic.

There are many sports that I enjoy. Football would be my favourite and what I consider myself best at. I have played football for most of my life, tennis for around 9 years, table tennis around 10 years and I started working out around age 16. Tennis, table tennis and gym are my other go-to's when it comes to physical activities.

© 2025 Daniel Ianev | All Rights Reserved

In the <main>, there are <divs> that I use to display the content

With display flex I ordered and positioned my images and text

Simple minimalistic colours and fonts.

When resized to a smaller scale, the content goes into columns. I used media queries

Within my <main>, I use the <form> to make the contact form

Basic ariel font with simple minimalistic style.

I positioned the placeholder and text area at the top left of my “Message” text area. When the message hits the end of the text area, it would then continue on the next line.
